this collection of essays explores the significance of modern chaos theory as a new paradigm in literary studies and argues for the usefulness of borrowings from one discipline to another its thesis is that external reality is real and is not merely a social construct on the other hand this volume reflects the belief that literature as a social and cultural construct is not unrelated to that external reality the authors represented here furthermore believe that learning to communicate across disciplinary divides is worth the risk of looking silly to purists and dogmatists in applying a contemporary scientific grid to a by gone era the authors play out steven weinberg s exhortation to mind the clues to the past that cannot be obtained in any other way it is of course necessary to get the science right yet the essays in this collection do not seek to do science but rather to suggest that science and literature often share common assumptions and realities thus there is no attempt to legitimize literary study through the adoption of a scientific approach interaction between the disciplines requires mutual respect and a willingness to investigate the broader implications of scientific research consequently this volume will be of interest to students and scholars of the long eighteenth century whether the focus is on england locke milton radcliffe lew diderot marivaux montesquieu or germany kant moritz goethe fr schlegel moreover given its multiple thrust in employing mythological philosophical and scientific notions of chaos this volume will appeal to historians and philosophers of the european enlightenment as well as to literary historians the volume ultimately aspires to promote communication across centuries and across disciplines

this collection of essays is devoted to the diversity of the conceptual and terminological definitions of the notion of the absolute absolute comprises both the concepts of the western world related to god and the verbal constructions flowing from these ideas in the spheres of law philosophy linguistics politics medicine literature and arts over time absolute and its neologisms have undergone various modifications assuming the associated characteristics of syntactic ambiguity and inflation absolute can imply an increase in the degree of a quality attached to some object or phenomenon and can be used as either an adverbial modifier or a proper noun in its appearances as a procedural term absolute mostly conveys a negative connotation when evaluating some action the question posed in this book is not what absolute is but what possibilities exist with regard to perceiving and conceptualizing it in human terms both historically and in the present

in the history of humanity as well as in the brief and recent history of the new paradigms in science we find theories of the way the heavens and the earth are or should be in this book our intention is to examine in depth those that build bridges humanity and consciousness are positioned as the foundation of the human being in the face of those who would reduce him to a genetic robot based on many years of work in the field we are offering a possible doorway to healing as a bridge of knowledge in day to day life so that my masters my patients can receive what they have taught me the magic of transforming an obstacle into a lever this book is therefore both theoretical and practical in order to assist in resolving those painful repetitions of our ancestors lives blind programming and painful wounds with a view to finding a healing path nature's and therefore

evolution's secret in which the psychology of complexity serves to reconcile us with life in our afflicted and opportune world

my writing career has been at least in this one respect idiosyncratic it had to mark and chart step by step its own peculiar campaign my earliest papers beginning in 1942 were technical articles in this or that domain of uralic linguistics ethnography and folklore with a sprinkling of contributions to north and south american linguistics in 1954 my name became fecklessly associated with psycholinguistics then successively with explorations in my theology religious studies and stylistic problems it now takes special effort for me to even revive the circumstances under which i came to publish in 1955 a hefty tome on the supernatural another in 1958 on games and yet another in 1961 utilizing a computer for extensive sorting of literary information by 1962 i had edged my way into animal communication studies two years after that i first whiffled through what gavin ewart evocatively called the tulgey wood of semiotics in 1966 i published three books which temporarily bluffed some of my friends into conjecturing that i was about to metamorphose into a historiographer of linguistics the topmost layer in my scholarly stratification dates from 1976 when i started to compile what eventually became my semiotic tetralogy of which this volume may supposedly be the last in the language of jabberwocky the word tulgey is said to connote variability and evasiveness this notwithstanding the allusion seems to me apt

synthesizing the findings from a wide range of disciplines from biology and anthropology to philosophy and linguistics the emerging field of biosemiotics explores the highly complex phenomenon of sign processing in living systems seeking to advance a naturalistic understanding of the evolution and development of sign dependent life processes contemporary biosemiotic theory offers important new conceptual tools for the scientific understanding of mind and meaning for the development of artificial intelligence and for the ongoing research into the rich diversity of non verbal human animal and biological communication processes donald favareau's essential readings in biosemiotics has been designed as a single source overview of the major works informing this new interdisciplinary and provides scholarly historical and analytical commentary on each of the texts presented the first of its kind this book constitutes a valuable resource to both bioscientists and to semioticians interested in this emerging new discipline and can function as a primary textbook for students in biosemiotics as well moreover because of its inherently interdisciplinary nature and its focus on the big questions of cognition meaning and evolutionary biology this volume should be of interest to anyone working in the fields of cognitive science theoretical biology philosophy of mind evolutionary psychology communication studies or the history and philosophy of science

for the majority of scholars the animal apocalypse is a militant text a piece of pro maccabean propaganda this text however develops theological reflections that are distinctly different from a justification of an armed struggle its themes are even incompatible with the maccabean movement it is impossible to condemn the second temple and at the same time mobilise people for a fight in order to purify that very temple after dealing with text critical issues this work challenges the thesis that the text is military propaganda through the use of narrative and historical approaches the analyses besides proposing a new way of studying an apocalypse spell out the peculiarity and the significance of the theology of the animal apocalypse in connection with the biblical history of israel and the theology of the qumran community

through a series of chapters and dialogues this volume presents a panorama of some of the paradigmatic changes that took place over the 1980s and 1990s in the field of systemic theory the authors are researchers who challenge boundaries in the culture knowledge practice landscape

giordano bruno and the geometry of language brings to the fore a sixteenth century philosopher s role in early modern europe as a bridge between science and literature or more specifically between the spatial paradigm of geometry and that of language through analysis of bruno s writings saiber exposes the verbal geometry of his language and shows how his writing necessitates a crafting of space and is in essence a lexicon of spatial concepts this study constitutes an original contribution both to scholarship on bruno and to the broader fields of early modern scientific and literary studies

presenting scenarios of hard and soft sustainability for the future he posed the critical question will the scientific and cultural instruments we have be enough to combat the pressures of unsustainable human behaviour now fully revised and still highly relevant this book will be of interest to technical and graduate audiences as well as general readers who wish to explore these issues further book jacket
